

The Telephone Consumer Protection Act, Docket -02-278, needs to be supported so that every person has a right to not be bothered by unsolicited telephone calls at various times of the day. Think of the elderly, such as when my mother was alive last yr., she couldn't hear the person well enough, she would feel an urgency to get to the phone, which I feel is a safety issue, and it was an overall source of frustration to keep answering a telephone with unnecessary interruptions of her day. I personally am tired of being asked for a variety of donations, solicited for vacations, siding, windows, etc. If I needed them, I'll get my own quotes, thank you.
